Title	Blue Road Wheel Display On Instrument Cluster Message Centre
Category	Electrical
Last modified	26-Oct-2015 00:00:00
Symptom	204000 Instrumentation
Attachments	11Blue wheel display in message centre.pdf (11Blue wheel display in message centre.pdf)

Content**Issue:**

A customer may report that a set of blue road wheels appear in the message centre on the Instrument Cluster, when the Terrain Response Control is set to Auto mode. On occasions the wheel position shown in the message centre appears to remain in a constant position that does not match the road wheel position. The display will return to normal when the vehicle is stationary. Please view the attachment that shows the message centre display.

Cause:

Software calculation. Low line Instrument Cluster affected only.

Action:

Land Rover are currently in the process of preparing a Technical Service Bulletin for release shortly to rectify the concern. In the meantime if you have a vehicle where the customer has reported the concern and requires a solution as quickly as possible, please raise a Technical Assistance case for further guidance.
