Subject Airbag Inflator Safety Recall and Safety Improvement Campaign PARTS UPDATE

DATE: April 17, 2015

TO: All Honda Parts & Service Managers and Personnel
FROM: American Honda Parts, Service & Technical Division, Campaign Administration

RE: Multi-Model Airbag Inflator Safety Recall and Safety Improvement Campaign **PARTS UPDATE**

Earlier this week, American Honda introduced new and different parts to support the various driver's airbag inflator safety recall and safety improvement campaign repairs.

As of today, April 17, 2015, new passenger's airbag inflators are available, and the bulletins supporting passenger inflator replacement have been updated.

You may receive a different part number than you ordered, and the inflator shape and appearance may be different from other inflators currently available. As a result, you will need to refer to the revised installation instructions available in the respective service bulletin for additional procedures related to these new inflators. Make sure you review the most recent service bulletin available for installation instructions and model applications, which inflators apply, and what your dealership can expect to receive when ordering parts.

The following bulletins are affected by these new parts and procedure revisions:

13-034: Safety Recall: Front Passenger's Airbag Inflator Can Be Over-Pressurized

14-040: Safety Recall: Front Passenger's Airbag Inflator Can Be Over-Pressurized

14-046: Recall: Front Passenger's Airbag Inflator May Produce Excessive Pressure After Long-Term Exposure To High Absolute Humidity

14-070: Safety Recall: Front Passenger's Airbag Inflator May Produce Excessive Pressure After Long-Term Exposure To High Absolute Humidity

As always, be sure to check VIN status inquiry on all vehicles that arrive on your service drive to determine if any outstanding safety recall or other campaign repairs apply.
