RE: Request for Parts: 2014-2015 MDX Front Wheel Bearing Noise

**Print this i/N message and provide a copy to the Shop Foreman and all Service Consultants.**

**Background**

American Honda (AHM) is investigating certain 2014-2015 MDXs with a complaint of a noise coming from the front wheel bearing while driving. The noise can be described as humming, moaning, or droning. To fully understand the cause of this occurrence, AHM would like to collect specific parts from the vehicle prior to you attempting a repair of any kind.

**Qualifiers**

1. Must be able to duplicate noise.
2. First time complaints only with no previous repairs.
3. Must have less than 15,000 miles.

**Action Required**

If you have or know of such a vehicle, please call the Technical Research & Support (TRS) Group at 800-880-1072. TRS will need to record certain vehicle information and provide you with further instructions.

Thank you.
