DESCRIPTION

REASON FOR THIS RECALL

Following notification from Spartan Motors Inc., Newmar has determined that a potential hazard exists in certain motor homes. On certain vehicles equipped with a Wabco quick release with double check valves, used to control park/spring brake application, the valve may leak internally. This could cause unintended partial or full park/spring brake application, which could affect service brake function and increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the valve and replace as necessary.

Motorhomes included in this recall include:

2014-2015 King Aire and Essex motorhomes built between 12/9/2013 and 12/16/2014.

These motor homes require immediate service. Continued use poses a potential safety hazard.
