Description

Lexus Enform Remote, Available on 2015 IS, GS, LS, RC, RC F and Navigation-equipped ES and NX, is an advanced vehicle app that enables you to connect to Lexus Enform Technology and manage your Lexus from any distance (as long as both your vehicle & smartphone are able to establish cellular connections). The app allows you to remotely lock/unlock your doors and start/stop the engine, find your parked vehicle, set speed/distance alerts for guest drivers, and send you the lock/unlock status after turning your vehicle off. Lexus Enform Remote is optimized for your smartphone but not for tablets.

Lexus Enform Remote features include:

REMOTE DOOR LOCK & UNLOCK: Not sure if you remembered to lock your vehicle? Now, you can remotely lock and unlock your doors and receive confirmation if the action was successful.

REMOTE ENGINE START & STOP: Whether it's a cold morning or hot afternoon, this feature lets you remotely start your vehicle to warm or cool the interior†. The engine will run for up to 10 minutes or until any door is opened, the brakes are pressed, or the engine is turned off remotely. **PLEASE NOTE:** If you are experiencing a low battery in app message prompt, see your Lexus Dealer or contact Lexus Customer Satisfaction at 1-800-25-Lexus for more information.

VEHICLE FINDER: The days of walking in circles through a parking lot are over. The Vehicle Finder uses the map on your smartphone to provide navigation to your vehicle's location.

VEHICLE STATUS & ALERTS: With the touch of a button, you can remotely check the vehicle's fuel level, odometer or trip mileage and current status of your windows, doors, trunk, moonroof and convertible top. The system can also notify you with customizable alerts.

GUEST DRIVER MONITOR: For added peace of mind when a guest borrows your vehicle, Lexus Enform Remote can send alerts if the vehicle is started or exceeds preset limits on speed, curfew, miles driven, distance from a set location, and time spent driving.

† Upon ignition, climate control functions will default to the last known settings.
