

Service Bulletin

INFORMATION

Subject: Original Equipment Batteries Part Number and ACDelco Replacement Battery Approved Warranty Part Numbers

Models: 2013-2015 GM Passenger Cars and Trucks

Attention: This Bulletin also applies to any of the above models that may be Export vehicles.

Correct battery cold cranking amperage (CCA) ratings and type are critical for proper test results when using the EL-50313. Access to the battery specification label, which contains the OEM part number and CCA rating and type, may be difficult without component removal. Refer to the table below for the original equipment ratings and part numbers used to set up a proper battery test. There has been some confusion as to the correct ACDelco battery warranty replacement. Refer to the table below for the correct battery warranty replacement.

Access to the battery specification label may be difficult or the vehicle is brought in with the wrong OEM battery installed. The parts catalog may have more than one service battery listed as a warranty replacement.

Refer to the table below for the correct OEM battery part number and ACDelco warranty replacement part number.

Important: Warranty Codes are only generated when the test is set up as follows: select Diagnostic Mode, select Out of Vehicle. The code under MID INFO is NOT the warranty code.

When testing batteries, you must:

- Select "Out of Vehicle" when setting up the test.
- Disconnect the battery from the vehicle.
- Connect the EL-50313 directly to the battery terminal posts. There is no need to remove the battery from the vehicle.
- Select the correct CCA and battery type.

Note: Entering the wrong CCA or battery type will generate a warranty code that when decoded, may cause a claim to be debited during an audit or pa review.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
