

Service Bulletin

PRELIMINARY INFORMATION

Subject: Diagnostic Tips for Unable to Shift Transmission Out of Park, Interior Lamps Inoperative and Left Rear Stop/Turn Lamp Inoperative

Models: 2013-2014 Cadillac ATS
2014 Cadillac CTS Sedan (VIN A)

Attention: This PI also applies to any of the above models that may be Export vehicles.

This PI has been revised to include the 2014 CTS (VIN A) and add a Note under Recommendation/Instructions. Please discard PI1042A.

Condition/Concern

Some customers may comment on any of the following concerns:

- Unable to shift transmission out of PARK (automatic only).
- Reading lamps are inoperative.
- Puddle lamps are inoperative.
- Courtesy/Dome lamps are inoperative.
- Sunshade lamp is inoperative.
- Instrument panel compartment (glove box) lamp is inoperative.
- Left rear stop/turn lamp is inoperative.

Further inspection may reveal that the 10 amp BCM 7 fuse (location 31) in the underhood fuse block is open (blown).

These conditions may be caused by one of the sunshades having a short to ground at the mounting base or internally at the pivot/extension tube.

Recommendation/Instructions

Disconnect the driver and passenger sunshade one at a time to see if the condition goes away.

- If the root cause is determined to be a short in the sunshade, replace the affected sunshade.
- If the root cause is determined to NOT be a short in the sunshade, refer to published diagnostics in SI to diagnose the remaining circuits.

Note: The wiring has been changed for 2015 model year to move the park lock feed to the Bat 6 fuse.

Warranty Information

For vehicles repaired under warranty, use:

Labor Operation	Description	Labor Time
1040390	Sunshade Replacement	Use Published Labor Operation Time

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
