

# Service Bulletin

## PRELIMINARY INFORMATION

**Subject:** Normal Characteristic - Daytime Running Lights Turn Off When The Turn Signals Are Activated

**Models:** 2014 - 2015 Chevrolet Camaro

*This PI was superseded to update Model Years. Please discard PIC5956*

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

### Condition/Concern

Some customers may comment that the Daytime Running Lamp (DRL) will turn off when the turn signal is turned on. This will only happen if the vehicle is equipped with High Intensity Discharge (HID) headlamps.

Example: When the left turn signal is turned on, the left DRL will turn off. When the right turn signal is turned on, the right DRL will turn off.

### Recommendation/Instructions

This is the normal operation of this lighting system, and no repairs should be made to try to repair this.

This is a design characteristic due to the close proximity of the daytime running lights to the turn signal which may make it harder to see the illumination of the turn signal during bright daylight conditions.

### Customer Information

Please communicate to the customer this condition is a normal operating characteristic of their vehicle. It will not impact the designed performance or reliability of the vehicle. Please share this information with the customer, including a copy of this message.

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

---

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
