

# Service Bulletin

## PRELIMINARY INFORMATION

**Subject:** Brake Pedal Does Not Raise After Apply, Brakes Remain Applied Or Brake Lights On Unwanted

**Models:** 2010 - 2015 Buick LaCrosse  
2011 - 2015 Buick Regal  
2010 - 2015 Cadillac SRX  
2013 - 2015 Cadillac XTS  
2013 - 2015 Chevrolet Malibu

*This PI was superseded to update Models and Model Years. Please discard PIC5692B.*

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

### Condition/Concern

In rare cases, a customer or technician may comment the brake pedal may not raise or seem stuck down after a normal braking event. The condition may occur in high temperature and humidity conditions and may not be repeatable. Brake lights will remain on and brakes may drag after pedal released. A pop, click or snap noise may be heard when pedal is applied or released.

If concern is intermittent allow the vehicle to idle for 30 minutes on max heat and floor mode to try and induce the concern.

This condition may be due to a bind in the brake pedal pivot bushing.

### Recommendation/Instructions

Replace the brake pedal arm.

**Important:** Be sure to use the two (2) new retaining clips that accompany the brake pedal arm.

To identify the correct brake pedal arm to order, please reference the Electronic Parts Catalog for the specific vehicle model and model year being serviced

### Warranty Information

For vehicles repaired under warranty use:

Labor Operation	Description	Labor Time
2441980	Brake Pedal Assembly Replacement	Use Published Labor Operation Time

### ADDITIONAL SI KEYWORDS:

C0131, C0161, C0277

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
