The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

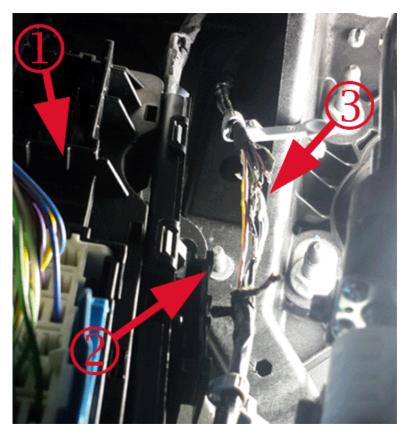

Condition/Concern

A vehicle may have a customer concern of an SES lamp and/or reduced power message with 5 volt reference 3 or APP codes.

On investigation there may be any of the following codes P0106, P0107, P0697, P2122, P2123, P2127, P2128 and P2138.

Recommendation/Instructions

Follow published Si diagnostics for the DTC's that have set, if it is inconclusive inspect the wiring harness near the left IP junction block

- 1. Left IP Junction Block
- 2. Mounting Stud where harness was pinched.
- 3. Damaged harness. Note... Harness tape has been removed.

Repair the damaged circuits as necessary.

Warranty Information

For wiring repairs covered under warranty, please refer to latest version of bulletin 10-00-89-005 for warranty information on wire/connector repairs.

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safety. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
