PRELIMINARY INFORMATION

Subject: Airbag Light Intermittently Comes On When Wipers Are Activated, DTC B0021 02 Set

Models: 2016 Chevrolet Camaro

Condition/Concern

Some customers may comment that the airbag warning light intermittently turns on when the wipers are activated. Upon investigation, the technician may find a DTC B0021 SYM02 set.

Recommendation/Instructions

This concern may be caused by electromagnetic interference (EMI) within certain circuits of the body harness of the vehicle. This concern will only act up if the windshield wipers are turned on. If the concern on the customer's vehicle remains when the wipers have been turned off, the concern is not the same as what is listed in this PI. Continue diagnosis using published Service Information. If you encounter this concern, please contact the General Motors Technical Assistance Center (TAC) for instructions on repairing this issue.

Note: This issue is NOT a safety concern. If this concern is occurring for the reason described in this PI, the air bags will still deploy in the event of a collision/possible rollover.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
