This PI was superseded to update Model List. Please discard PIT5356.

Condition/Concern

A customer may comment that when listening to an iPod that the first song will still be displayed when the next song in the list is playing.

Recommendation/Instructions

Engineering has deemed this to be a normal operating characteristic of the vehicle and no repair attempts should be made. This concern can be remedied by pressing the "next" button while the device is playing. This will allow the system to display the current song.

Customer Information

Please communicate to the customer this condition is a normal operating characteristic of their vehicle and that the current song can be displayed by pressing the "next" button while the device is playing. This will not impact the designed performance or reliability of the vehicle. Please share this information with the customer, including a copy of this message

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
