## 15 Engine rattling noises at cold start - V6 3.0 TFSI

15 15 26 2039995/1 March 3, 2015.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
All	2011 - 2014	All	V6 3.0 TFSI

## Condition

Rattling noises are heard from the timing chain drive for about 1-3 seconds after the first engine start of the day.

## Technical Background

The noises are caused by one of the upper chain tensioners. The noises do not lead to damage.

## Production Solution

Improved chain tensioner.

## Service

1. Verify condition by observing engine sound during cold start.
2. If the rattling noise comes from the area of the timing chains (back of the engine) for 1-3 seconds after the first start of the day, replace both upper chain tensioners of bank 1 and bank 2 with the optimized chain tensioners.
