Resetting the service interval display

Your authorized Audi dealer will reset the corresponding service schedule after performing the appropriate service on your vehicle. You also have the possibility to reset the oil change schedule after having performed an oil change according to Audi specifications.

Select function button **CAR** > **Systems*** > **Service interval display** > **Reset oil change interval**.

Note

If you disconnect the battery terminals, no calculations can be made for the service interval display during this time and no service reminder will appear. Remember that observing the proper service intervals is vitally important to extending the life of your vehicle, particularly the engine, and maintaining its value. Even if the mileage driven is low, the maximum period of one year from one service to the next must not be exceeded.

Tips

- Do not reset the display between oil changes, otherwise the display will be incorrect.
- The information in the Service Reminder remains stored even when the vehicle battery is disconnected.

Q7 - 2011 FLUID CAPACITY CHART updated 21 June 2011

Vehicle (Sales Code)	Engine Oil approx. qty. w/filter change	6 Speed Auto Trans	8 Speed Auto Trans	Final Drives	Cooling System	Power Steering	Brake System	A/C System	Windshield & Headlight Fluid
