

Service Information

Special Tools and Equipment

Number: VSE-15-28

Subject: VAS 6774 Fuel Identification Unit MRT Auto
Shipment AT-380 (US Only)

Date: December 3, 2015

Supersedes VSE-15-26 due to revised wording.

Volkswagen Group of America is pleased to inform you of the release and automatic delivery of the VAS 6774 Fuel Identification Unit.

Poor fuel quality can negatively impact vehicle performance or even damage the fuel system. This tool enables you to quickly pre-analyze the fuel to determine if it may be contributing to a vehicle's symptoms. This tool will also be required to determine if a high pressure fuel pump replacement on a common rail TDI vehicle will be covered under warranty. Specific details related to the use of this tool for a common rail TDI high pressure fuel pump replacement will be included in the appropriate technical service bulletins.

Proper maintenance and cleanliness is required for this tool to ensure its functionality.

Please review the instructional DVD included in the tool case titled 'Fuel-Identification Kit VAS 6774'. Here you will find a user manual, an FAQ, and a video that will describe the proper way to use, clean, and maintain this tool. The instructions are also posted to ServiceNet by going to ServiceNet> Workshop Equipment> Tool Information> Instruction Manuals & Videos> Manuals> VAS 6774 Fuel Identification Unit Operating Instructions.

Starting December 7, 2015, every Volkswagen dealer will be shipped one AT-380 Special Tool Package by the Volkswagen Special Tools Program (Snap-On Business Solutions - SBS), free of charge.

For dealers that wish to order additional AT-380 Special Tool Packages, please notify the Volkswagen Tools and Equipment program by contacting us at (800) 892-9650. Additional orders will be filled in the order they are received after the automatic distribution has taken place and invoiced at current dealer pricing.

If spare parts are needed for the kit, they can be ordered by going to www.vw.snapon.com.

Shipping and billing inquiries should be directed to the Volkswagen Tools and Equipment program at (800) 892-9650.
