Service Information

wiTECH™

Number: VWI-15-02

Subject: Programming Control Modules using wiTECH

Date: July 7th 2015

Supersedes VWI-14-01 due to required wiTECH software level update for programing the WIN module.

1.0 – Procedure

Prerequisites:

- ☐ **wiTECH desktop client** version must be **V13.04.15** or higher.

To check and install the latest version, refer to **Service Information – wiTECH** document title: **wiTECH™ – Software Installation Instructions**

- ☐ Connect battery maintainer to vehicle requiring ECU update.

1. Connect StarMOBILE pass-through to vehicle
2. Switch ignition on.
3. Launch wiTECH application on laptop.
4. Login to **DealerCONNECT** and press **Finish**:

Connection Wizard
DealerCONNECT Login

Enter your User ID, Password and Dealer Code, then press "Finish" to log in to DealerCONNECT.

Warning! Access to Chrysler's computer systems is controlled. UNAUTHORIZED ACCESS OR USE IS STRICTLY PROHIBITED. Authorized users are hereby informed that Chrysler management may monitor this use and ensure compliance. Chrysler may terminate access privileges, take disciplinary action and/or institute civil or criminal proceedings to enforce this policy.
