Service

INDEX OF INFORMATION

- The detailer's role
- Inspecting vehicle cover for damage (to be completed within 48 hours of delivery to dealership)
- Shipping damage
- Spin-woven covers, removal and disposal
- Rapguard® removal and disposal, vehicle inspection, and residue removal
- Exterior body, wheels and tires
- Paint finish, inspecting for swirl marks
- Exterior glass, cleaning
- Interior, cleaning
- Additional information

Tip: Part numbers listed in this bulletin are for reference only. Always check with your Parts Department for the latest parts information.

The detailer's role

The impact you have on the Audi customer is immense. You play a vital role in delivering a perfect Audi to your customers. The delivery process is exciting for our customers. Your attention to detail will give an Audi customer a positive experience about his or her new car far beyond the first day of delivery. By preparing a perfectly-detailed vehicle for your customer, you are not only meeting or exceeding your customer's expectations, you are also helping to eliminate any buyer's remorse (the feeling of anxiety people experience after making a large or important purchase).

To help you with your detailing role in the perfect delivery process, refer to the Detailer Inspection Checklist (delivered with the vehicle).

Printed pages (non-carbon copies) of the Perfect Delivery procedure can be viewed on ServiceNet and in the PDI chapter of the After Sales Process Handbook in \rightarrow AccessAudi.com

Unless otherwise instructed, the completed and signed checklist should be left in the glove box of the vehicle for easy access by the Audi Brand Specialist (ABS).

Please know that you have a team behind you with excellent products and support to enable you to make a perfect delivery each and every time!

By utilizing the following procedures, you will be able to exceed the customer's expectations and deliver the finest vehicle possible.

Inspecting vehicle cover for damage

1. When the vehicle arrives at the dealership, leave the spin-woven cover on the vehicle until the cover can be inspected.

Page 2 of 22

No part of this document may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, nor may these materials be modified or reposted to other sites, without the prior expressed written permission of the publisher.

2. Within 48 hours after arrival at dealership, inspect the complete spin-woven cover for damage. If the spin-woven cover is damaged (torn, cut, etc.), remove the cover using appropriate steps to allow for inspection of damage. If any shipping damage is found, see *Shipping Damage*.

Shipping damage

1

You must note the damage on the Carrier Delivery Receipt, including damage type, extent, and location. Failure to note damage on the Carrier Delivery Receipt will result in non-payment of the repair.

Tip: For all transportation issues, refer to Chapter 5 of the Warranty Policies and Procedures Manual.

Spin-woven covers, removal and disposal

1. Unzip and fold cover toward center (Figure 1).

Figure 1. Unzip and fold cover.

Figure 2. Roll cover upward.

2. Roll cover upward (Figure 2).

3. Insert fabric strip into tab provided to retain cover (if applicable) (Figure 3).

Figure 3. Inserting fabric strip.

The door can be now be opened, making it possible to move the vehicle if necessary.

After it has been opened to allow driver access to move the vehicle, close the cover immediately to ensure continued protection against contamination from industrial materials.

 With cover access door unzipped, folded and retained, open driver's door and remove cover from sill (rocker panel) (Figure 4).

Figure 4. Remove cover from sill.

Rapguard[®] removal and disposal, vehicle inspection, and residue removal

Vehicles are shipped with Rapguard. This self-adhering plastic product is applied in certain areas of the vehicle and is designed to provide protection from all types of possible damages.

Rapgard must be removed from the vehicle no later than six months after application. See sticker (location on vehicle body varies) for detailed information.

- Ensure that the vehicle is at room temperature. The ideal body surface temperature for Rapgard removal is 60°F (15.5°C) to 80°F (26.6° C).
 If body surface temperatures are below 60°F (15.5°C) or above 80°F (26.6° C), then removal procedure should be performed indoors after surface temperatures have been allowed to stabilize within the given range.
- 2. Rinse vehicle thoroughly with water to remove surface dirt or dust and to help stabilize body surface temperatures.
- 3. Starting at the corners of each panel, carefully remove Rapgard from vehicle.
- 4. Dispose of Rapgard as normal plastic waste. If unsure about proper disposal procedures in your area, check local regulations.

Vehicle inspection after Rapgard removal

Inspect painted surfaces either indoors under fluorescent lighting or outdoors under bright sunlight.

- If any scratches, dings, or dents are identified: Important: If any defects (scratches, dings, dents and other types of body damage) on the exterior are identified, contact your supervisor and arrange to repair defects immediately. Repairs *must* be completed prior to delivery.
- If paint discoloration is identified:

After removal of Rapgard, some vehicles may exhibit temporary paint discoloration or paint swelling caused by moisture trapped under the Rapgard. The discoloration looks like shaded or dark magic marker lines. This swelling will disappear with exposure to the sun or heat lamps within 2 - 3 hours. Severe paint swelling may require 2 - 3 days to recover.

Tip: Do *not* buff or refinish paint for this condition.

Remove paint discoloration with a heat gun using the following procedure:

- a. Hold heat gun approximately 3 inches away from affected paint surfaces and apply heat using slow oscillating motions until discoloration is gone.
- b. If discoloration remains, wipe the heated area with Isopropyl alcohol and repeat procedure to increase surface drying.
- c. If this process is not successful and discoloration remains, refer to TSB 2014055: 55 Paint spotting on top surfaces.

After discoloration is removed, or if no discoloration was detected, inspect and remove any adhesive residue.

Rapgard adhesive residue removal

- 1. Remove light lines of adhesive residue with Perfect-It[™] non-abrasive polishing products for light- or dark-colored vehicles.
- 2. Remove thick lines of adhesive residue with a general purpose adhesive cleaner.

Exterior body, wheels and tires

Body, cleaning

1. Wash and dry vehicle exterior.

Tip: Do *not* wash or dry vehicle in direct sunlight. Rapid water/soap solution evaporation may form water spots on the paint surface.

The plush fibers of the Audi Car Wash Mitt carry an abundance of soap and water to help loosen and lift away dirt and grime from the vehicle's surface.

- 2. Inspect interior floors and glass for water leaks.
- Inspect paint surface, moldings and glass.
 Important: If any defects on the exterior have been identified (scratches, dings, dents, and other types of body damage), contact your supervisor and arrange to repair defects immediately.

Wheels and tires, cleaning

- 1. Remove protective cover from wheels (if applicable).
- 2. Remove thick lines of adhesive residue with general purpose adhesive cleaner.
- 3. Clean alloy wheels and tires. Alloy wheels can be cleaned with ease without damaging the finish.

Exterior finish, applying wax

Wax each vehicle prior to delivery to the customer.

Finish can be significantly improved without the use of harsh polishing compounds and high speed buffing. Either 3M[™] Performance Finish or 3M[™] Perfect-It[™] Show Car Paste Wax may be used to wax the vehicle.

- To wax with 3M[™] Performance Finish:
 - a. Gently apply a thin, uniform film to the paint surface using a terry cloth wax applicator or a clean, soft, folded, cotton terry cloth towel.
 - b. Allow to dry to a hazy finish.
 - c. Remove residue and buff to a high gloss.
- To wax with 3M[™] Perfect-It[™] Show Car Paste Wax:
 - a. Apply wax to panel-sized area (door, fender, etc.) using a firm circular motion.
 - b. Allow wax to dry to a hazy finish.
 - c. Use 3M[™] Perfect-It[™] III Detailing Cloth to polish the finish by hand.

Exterior glass, cleaning

3.

17).

Follow these directions to address residue, a rough surface, a snakeskin appearance, or streaking on the windshield.

- 1. Shake bottle of 3M[™] Glass Polishing Compound to mix product evenly.
- 2. Apply cleaner directly to outside of windshield on both driver and passenger sides (Figure 16).

Using a clean, dry microfiber cloth (Such as 3M[™]

Try to avoid applying product to window trim.

Perfect-It[™] III Auto Detailing Cloth Yellow), vigorously clean windshield with long, horizontal strokes (Figure

Audi

Figure 16. Cleaner applied to windshield.

Figure 17. Cleaning windshield.

4. Allow to dry until a fine film layer (haze) forms.

Tip: Drying time is based on ambient temperatures. Temperatures of 15°C or lower can extend drying time.

Engine compartment, cleaning

Wipe down engine compartment.

Tip: Do not use chemicals containing silicone.

Interior, cleaning

- 1. Clean all interior mirrors and glass (including sunroof if applicable).
- 2. Remove all trim protection, coverings, and decals.
- 3. Remove decals, stickers, and shipping labels.

- 4. Inspect all interior surfaces and compartments (including upholstery, sun visors, and headliner). Clean as required (see below).
 - On leather upholstery, use 3M[™] Scotch-Brite[™] Type T Scuff Sponge with a small amount of soapy water to clean stubborn dirt. Also see TSB 2004327: 74 Leather upholstery, cleaning tips.
- 5. Check for excessive grease on seat tracks and clean as necessary.
- 6. Vacuum carpet.

© 2015 Audi of America, Inc.

- 7. Check luggage compartment. Vacuum if necessary.
- 8. Check color match of front/rear floor mats.
- 9. Install mats, including locking clips/tabs if applicable.
- 10.Perform final inspection in daylight or under fluorescent light to ensure that the vehicle is free from visual defects, and that it is completely clean.
- 11.Complete and sign the Detailers Inspection Checklist.
