Dear Audi Dealer Principal, Service Manager, and Parts Manager:

This communication is to inform you of upcoming Update **20W8**.

What vehicles are affected?

There are 10 Audi vehicles affected in the U.S. by this Update.

What is the issue?

On Audi A8 vehicles with W12 engine manufactured within a specific period, it is possible that the fuel tank breather line leading to the activated charcoal filter may have been damaged by the use of an unsuitable spring-type clip. The fuel tank breather system may develop a leak as result.

What does the repair procedure involve?

Replace t-piece connector and clamps.

When will the Update be available?

This Update will be visible in Elsa and ServiceNet on or about October 6, 2015.

Please refer to the Elsa campaign/action screen for confirmation of whether the Update applies to each specific vehicle. Additionally, this Update is posted on Elsa and ServiceNet for additional information and complete repair instructions.

Consistent with general Audi corporate policy governing Updates, Audi is not notifying consumers. (Updates differ from recalls and service actions; consumers are notified in writing of recalls and service actions.) Each vehicle should be completed when it is in to the dealer for maintenance or any other service visit. Dealer stock vehicles **cannot, however, be delivered** to consumers until the Update is completed.

To identify any vehicles in your inventory that are affected by this Update, please run the "New and CPO Inventory Open Campaign/Action Listing" report from the OMD Web/AIM system.

Dealers must ensure that every affected vehicle gets the update before delivery to consumers. Your effort is integral in reaching the highest quality expectations of Audi customers.

Thank you for your cooperation and assistance in this important matter.
