FSB 222-004, Oil Filter Housing

(June 2015)

The introduction of a new style oil filter housing requires replacement of the oil cooler inlet pipe when replacing the previous style housing on US2010 and US2014 emission VOLVO D13 engines. Installation procedures remain the same, refer to Function Group 22 in Impact for proper installation. The updated oil filter housing is expected to go into production September 2015.
