**Freightliner
 Service Bulletin**

General Information

Daimler Trucks North America recommends using the FluidXchange tool (FXC-2V-700) for removing and replacing antifreeze. See **Fig. 1**. Vehicles equipped with Cummins engines are standard with this quick-disconnect fitting at the radiator drain point. Vehicles equipped with Detroit engines can be ordered with an optional quick-disconnect fitting. See **Fig. 2**. Refer to the FluidXchange literature for operating instructions.

Fig. 1, "FluidXchange" Tool (FXC-2V-700)

1. Quick-Disconnect Fitting
2. Lower Radiator tank.

Fig. 2, Quick-Disconnect Fitting

Parts

The tool and parts are available from:

Dunn & Bybee Tool Company
 635 Industrial Drive
 Sparta, Tennessee 38583
 931-738-3611

Go to www.fluidxchange.com for more information.

Table 1 lists the recommended tools for servicing Freightliner vehicles.
