SUBJECT: MY-All, Model 205

Care of Interior Trim Pieces

Depending on the selected equipment, model 205 trim pieces on the center console and doors have a piano lacquer finish. If dust has collected on the surface (Figure 1) (A) owing to static charging, dry cleaning using microfiber cloths can cause fine scratches on the surface (A).

To reduce the sensitivity of the interior trim pieces to scratching, a coating has been applied to the surface (Figure 1) (A) at the factory. To maintain the surface protection properties of the coating and to prevent scratching of the surface (Figure 1) (A), do the following when cleaning:

1. Never dry clean the surfaces.
2. Do not treat any trim pieces with commercially available cleaners as they can remove the coating.
3. Use a cotton cloth from the Mercedes-Benz product range in combination with clear water.
