SUBJECT

Seat Belt Flaps when Soft Top Open

MODEL

F23 (2 Series Convertible)

SITUATION

While driving with the soft top open and the side windows lowered, the seat belt flaps from the wind at road speeds of 30 miles per hour or higher.

CAUSE

The seat belt is directly in line with the wind.

PROCEDURE

Replacing parts will not rectify the situation.

To avoid wind interference, both rear side windows must be raised up by 20 mm. This directs the wind away from the seat belts.

WARRANTY INFORMATION

Not applicable.
