SUBJECT:

Front Brake Squeak/Squeal Noise

OVERVIEW:

This bulletin involves cleaning excessive sealant from the front brake caliper adaptor brackets and replacing the adaptor bracket mounting bolts.

MODELS:

2015 (BU)

Jeep Renegade

- NOTE: This bulletin applies to vehicles within the following markets/countries: EMEA
- NOTE: This bulletin applies to vehicles built on or before February 25, 2015 (MDH 0225XX).

SYMPTOM/CONDITION:

The customer may describe a front brake squeak/squeal noise during moderate brake apply combined with light steering. The noise typically occurs with warm brakes after several brake applications.

DIAGNOSIS:

If the customer describes the symptom, perform the Repair Procedure.

PARTS REQUIRED:

Qty.	Part No.	Description
1		BOLT, Hex Flange Head, M14X1.50X30.00 (Package Contains 4 Bolts)

REPAIR PROCEDURE:

- Lift and support the vehicle. Refer to the detailed service procedures available in DealerCONNECT> TechCONNECT under: Service Info> 04 - Vehicle Quick Reference> Hoisting> Standard Procedure.
- Remove the front wheels. Refer to the detailed service procedures available in DealerCONNECT> TechCONNECT under: Service Info> 22 - Tires and Wheels> Removal and Installation.

3. Remove the brake caliper retainer spring (1) (Fig. 1).
