F31 (3 Series Sports Wagon)

F34 (3 Series Gran Turismo)

F80 (M3 Sedan)

Produced from 7/1/2014

With option 5DL (Surround View or Top View)

SITUATION

After programming with ISTA/P 2.53.5 or a more recent version, the rear camera view is displayed when the reverse gear is selected. The vehicle does not remember the last user mode (surround/top camera view).

INFORMATION

An operational concept change for the surround/top camera view was introduced with ISTA/P 2.53.5 (I-level Fxx-14-07-505). When the reverse gear is selected, the default view will be the rear camera.

The surround/top camera view has been removed from the last user mode function. This is to meet the upcoming (new) federal regulations regarding rear view cameras.

Note: The surround/top camera view is available, but the driver must manually switch the camera view using the iDrive controller.

PROCEDURE

Please advise the customer of this change in the operation concept. Do not replace parts or program the vehicle, as this will not change the operation.

WARRANTY INFORMATION

This Service Information bulletin provides technical information on a specific change in functionality for regulatory compliance.
