SUBJECT: Shifting to Neutral and P0883 Code in Freightliner Chassis

MODELS AFFECTED: 3000 and 4000 Series Product Family Transmissions in Freightliner Trucks

Description of Complaint:

Customers may experience the transmission shifting to neutral while driving accompanied by a P0883 TCM Power Input Signal High code.

Cause:

Loose fuses in the Freightliner PowerNet Distribution (PNDB) panel can cause TCM voltage to spike in excess of 16V. Refer to Figures 1 and 2.
