MY2016 Ford US Chassis Price

Minotour

Pricing is released for MY2016 Ford US chassis.

MY2016 was effective April-01-2015 and will remain in effect until August 2016. This is a longer model year than normal, and allows us to order current model year chassis well into 2016 with good delivery from Ford.

Please note, the 5.4L V8 engine which Thomas only offers on the E350, is being discontinued effective the end of CY2015. The E350 will then only be available with the 6.8L V10 engine until a replacement V8 is made available late 2016.

The good news is Ford will be offering a 12,500lb GVWR, 158"wb E350, later this year. Although available for other vocations the chassis is not yet school bus certified and no timeline has been given for release to order. Speculation is available for late summer ordering.

Thomas has reactivated our pool status and we will be carrying a quantity of both yellow and white chassis in inventory. The good news from Ford is there is no allocation and timely production.

Provided all the customer details are provided at time of body order, we will be able to have any chassis assistance deducted at time of body invoice. Customer name, address and FIN code is required.

Requesting a Ford chassis number is the same practice as you have been using for GM from Kevin Clark.

Attached is the MY2016 Ford US Price document.
