Allison Transmission 7 Year Warranty

As announced at the NAPT conference in Richmond, Va., Thomas Built Buses is pleased to announce that we will provide our customers with an additional two years of transmission warranty coverage for a total of seven years. This additional coverage will be provided on all school buses built in calendar year 2016 that include the 2500 PTS, 2550 PTS, 2300 PTS, or 2350 PTS transmissions. Please be aware that the 2200 PTS transmission is not included in this program.

This additional coverage is just another way Thomas Built Buses is making a commitment to the lowest total cost of ownership for our customers. This coverage is being provided on all units built on or after January 1, 2016 through December 2016 at no additional cost. This coverage is just another way to differentiate our products from our competitors. You should make every effort possible to include this extended coverage in all school bus specifications.
