Fabric Update- 5/20/2015

In collaboration with our fabric vendor, we are informing all customers of a modification to the Bolster Grey material used on Freedman Seating passenger seats. Due to changes in yarn availability, this material will carry a slightly lighter shade than its previous version.

What does this mean to customers?

Freedman Seating understands the importance of consistency and quality; therefore, this update will be permanent. The new Bolster Grey will be introduced in a rolling process, ensuring that individual seats and buses will maintain a consistent look with one shade. Freedman Seating cannot, however, guarantee that a complete bus run will include only one shade.

Freedman Seating believes this modification falls within an acceptable tolerance range and will continue to provide excellent products and services to its customers.

Please feel free to contact your Freedman Seating representative or visit www.freedmanseating.com if you have any questions or to request a swatch sample.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Cohen", is written over a light blue horizontal line.
