Product Improvement -10/12/2015

Going forward, customers will see a change in USR kits for our WHAM foldaways. The cable buckles (56198) will be replaced with a LCR buckle (44075).

LCR buckle (44075) conforms to FMVSS 302 as well as all applicable portions of FMVSS 209, the same as the cable buckle (56198). Performance of seating system utilizing LCR buckle as a replacement for the cable buckle will be the same and will not require any FMVSS 210 re-certification testing by customers.

Notice, this will only apply to USR kits ordered for WHAM (wheel well foldaway seats).

Please contact your Freedman Seating representative if you have any questions.

Thank you.

A handwritten signature in black ink, appearing to read "Dan Cohen".
