2015- F-150 and Mustang- Diagnostic Trouble Code (DTC) P062B Stored in Powertrain Control Module(PCM) Memory

Some 2015 F-150 and Mustang equipped with 3.5L PFI and 5.0L PFI Engines may exhibit Diagnostic Trouble Code P062B(Internal Control Module Fuel Injector Control

Performance) stored in Powertrain Control Module(PCM) memory. DTC P062B is not a Malfunction Indicator Light(MIL) code and will not result in Drivability concerns.

This DTC may have set during a quick key off/key on cycle event. If this DTC

is present, clear the Diagnostic Trouble Code from the PCM. Do not replace the

Powertrain Control Module. If DTC repeats, refer to Powertrain Control Emissions

Diagnosis(PC/ED) manual Pin Point Test QE to diagnose the concern. Monitor OASIS

for future updates.
