2015 Mustang 2.31 and 5.0L Equipped Vehicles- Check Engine/Wrench Lamp On-
DTCs P025AIUO 1 09/P06E4 - Remote Start Used In Transport Mode

Some 2015 Mustang vehicles with Remote Start feature may exhibit DTC P025A stored in PCM memory with Crank No-Start or Stall concern. This may be due to a Remote Start requested while the vehicle is in Transport mode. Remote Start is not supported in Factory or Transport mode and if requested will result in DTC P025A being set. To turn off transport mode, turn ignition on(KOEO), press the Brake pedal five times and press the Hazard lamp switch two times (on, off~ until vehicle instrument cluster indicates that is in Normal mode on the message center. Start engine to ensure all electrical components operate properly. Clear the DTC. If vehicle is in Factory Mode, press the start/stop button 100 times (50 on/50 off) to clear Factory Mode, then proceed to clear Transport Mode. Be sure to deactivate Transport Mode during PDI.
