44972 2014-2015 Fiesta - A/C Compressor Lockup - Vehicles In Storage Or Used Infrequently

Some 2014-2015 Fiesta vehicles stored or parked for extended periods of time may experience A/C Compressor lock up on startup. This can be avoided by starting vehicles every 15 days as directed in Section 2 of the Warranty and Policy Manual. Under the Powertrain heading it is stated to run until reaching operating temperature with accessories off. We recommend that the A/C system be set to defrost mode during this time to prevent A/C Compressor lock up. Please share this information with your Sales Department.
