44978 2013 Taurus - Factory Remote Start - Activated Heated Seat Operation

Some 2013 Taurus vehicles equipped with factory remote start, dual automatic temperature control (DATC), and heated seats may experience heated seat operation after a remote start without customer input, on non-intelligence access (IA) equipped vehicles. This applies to vehicles equipped with heated only seats, and does not apply to vehicles equipped with heated and cooled seats. Reprogram the HVAC to the latest calibration using IDS release 94.03 or higher. Make sure you are connected to the internet when entering module programming to obtain the latest updates. Calibration files may also be obtained at www.motorcraftservice.com. Use applicable 12651D labor operations in section 10 of the SLTS manual. Use causal part 19980 for reprogramming only.
