45022 2015 Transit Experiencing Crank No Start, Hard Start Or Runs Rough Type Concerns

Some 2015 Transit vehicles may exhibit a drivability concern such as crank no start, hard start or runs rough. If the engine air filter is found to be saturated with water or frozen engineering is aware of the concern and working on a resolution which will be communicated via OASIS. This issue typically occurs when the vehicle has sat for an extended period of time and experienced a significant amount of rain or snow. Regular vehicle usage can naturally dry a damp air filter element during normal engine operation. Keeping windshields free of ice and snow when static will help reduce potential for this concern.
