

Service Campaign Bulletin

SB-10058274-5382

Mercedes-Benz

Campaign No. 2015030003, March 2015

TO: ALL MERCEDES-BENZ CENTERS

SUBJECT: **Model 205 (C-Class), Model Year 2015**
Update Engine Control Module Software

This Service Campaign has been initiated because Daimler AG (DAG), the manufacturer of Mercedes-Benz vehicles, has determined that the software in the engine control module does not meet specifications. It is therefore possible that a communication error may occur between the engine control unit and the ESP control unit. This communication error may result in fast torque control via ignition angle not being possible. To correct this condition dealers will update the engine control module software at the next dealer visit.

Prior to performing this Service Campaign:

- Please check VMI to determine if the vehicle is involved in the Campaign and if it has been previously repaired.
- Please review the entire Service Campaign bulletin and follow the repair procedure exactly as described.

Approximately 5 vehicles are affected.

Order No. P-SC-2015030003

This bulletin has been created and maintained in accordance with MBUSA-SLP S423QH001, Document and Data Control, and MBUSA-SLP S424HH001, Control of Quality Records.
