45201 2013 - 2014 F150 Low Speed A/C Performance Enhancement - Cooling Fan Strategy Update

2013-2014 F150 Engine Cooling Fan strategy has been changed to improve low vehicle speed A/C performance. The Engine Cooling Fan is more noticeable at higher ambient temperatures than previous model years. This is a normal condition to improve low vehicle speed A/C performance, and no repair should be attempted.
