Text

DESCRIPTION:

The front park assist sensor bracket may come loose from the lower grill. The clamping force on the bracket in the lower grill may be too low.

VEHICLE REPORT:

Yes, please submit a Vehicle Report if the service solution described in this TJ has no effect. Use concern area "Vehicle Report" and sub concern area "Support Not Needed", use function group 3660.

SERVICE:

In case of customer complaints of a loose park assist sensor bracket, follow the attached instruction to assemble a foam block on the bracket to increase the clamping force.

Orientation view

Note! Removal steps in this procedure may contain installation details.

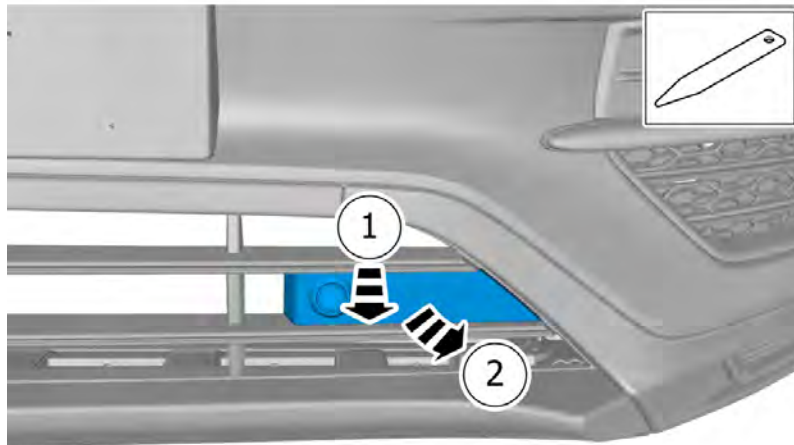

Note! This colour chart displays (in colour print and electronic version) the importance of the different colours used in the images of the method steps.

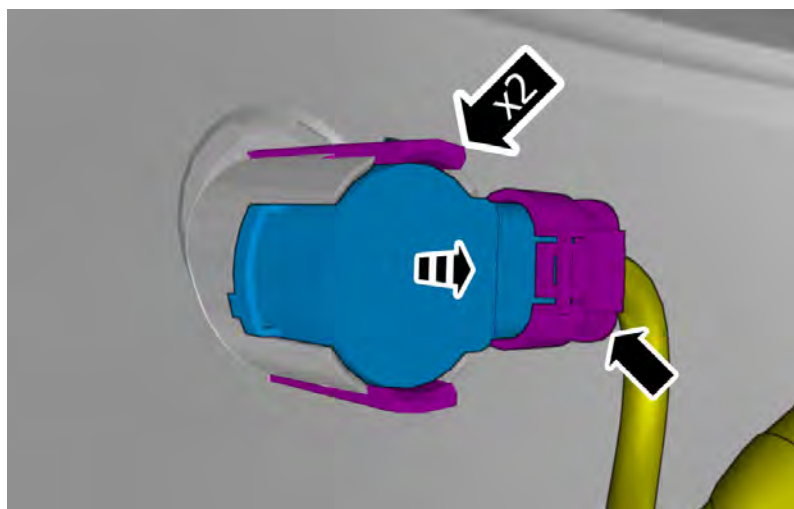

- 1 . Used for focused component, the component with which you will do something.
- 2 . Used as extra colors when you need to show or differentiate additional parts.
- 3 . Used for attachments that are to be removed/installed. May be screws, clips, connectors, etc.
- 4 . Used when the component is not fully removed from the vehicle but only hung to the side.
- 5 . Used as background color for vehicle components.

Removal

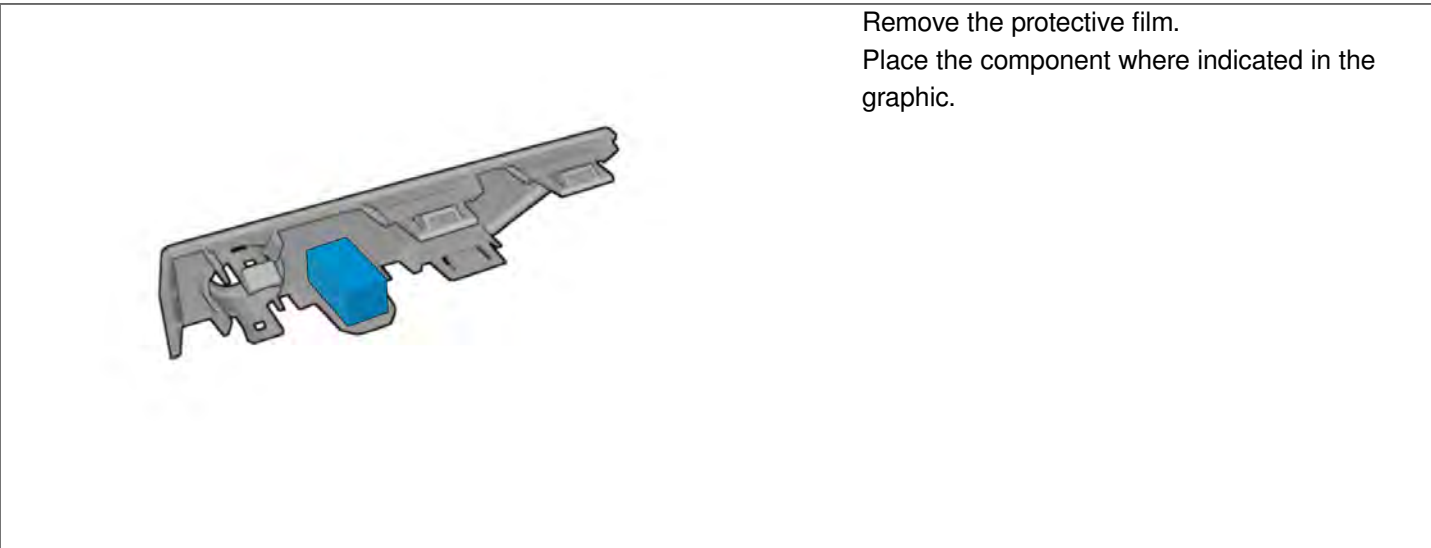

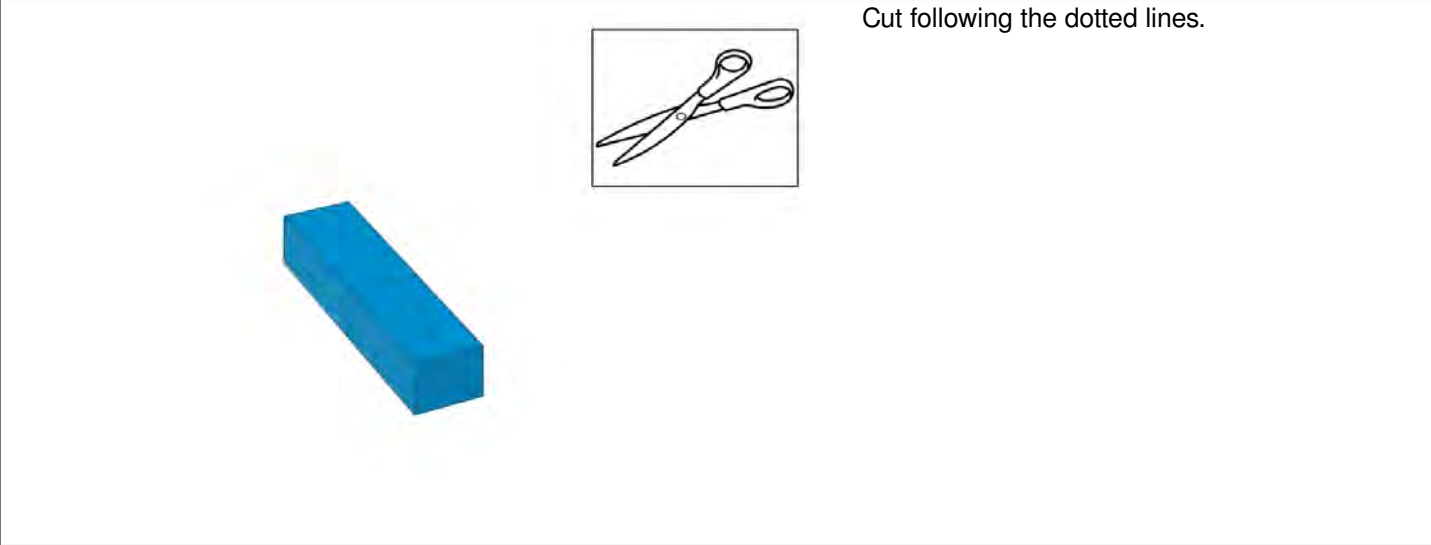

Note! Removal steps in this procedure may contain installation details.

- 1 . **Use:** Interior trim remover
- 2 . Remove the marked part.

Disconnect the connector.
Release the catches.
Remove the marked part.

On both sides.

Installation

To install, reverse the removal procedure.

Check for correct operation.
