ADJUSTABLE COUPLER BOLTS

It has been brought to our attention that the bolts on the Bulldog adjustable ball coupler may not always extend past the nut when tightened. This 5/8" x 4.5" bolt is the industry standard bolt size as specified by Bulldog and comes with this coupler. To make certain that threads will extend past the nut in this application we have custom ordered these couplers with a 1/2 inch longer bolt (5/8" x 5.0") going forward. Over the next few weeks we will be making the change to the longer bolts throughout our manufacturing facility and on hand inventory at each plant.

If you have a customer with this concern or a unit in stock you want longer bolts for, please contact our warranty department (866-752-8781 and warranty@pjtrailers.com) and we will ship out replacement bolts for these units at no charge.

Adjustable coupler bolts
will now be 1/2" longer
