SB-10058974-6539

BMW	SI B09 05 15 Programming/Coding Explanations	July 2015 Technical Service

SUBJECT
Front Parking Lights Inoperative

MODEL
F30 (3 Series)

F31 (3 Series Sports Wagon)

Vehicles produced up to June 30, 2015

SITUATION
After programming the vehicle with ISTA/P 3.56.1, both front parking lights (integrated in the headlights) have been deactivated and no Check Control message is displayed.

CAUSE
FEM software error in ISTA/P 3.56.1

PROCEDURE
Solution is planned to be released with ISTA/P 3.56.2.004

Until ISTA/P 3.56.2.004 becomes available, **do not** carry out any programming or coding on the affected vehicles.

In critical cases where programming and coding needs to be performed, please submit a PuMA case titled "F30: Park light INOP". Once we receive the PuMA case, we will provide you with further instructions.

ISTA/P 3.56.2.004 will be released on Monday, August 3, 2015, I-Level F020-07-503. When the update software is loaded, you can resume using ISTA/P to program the affective vehicles.
