45175 2015 F-150 - Harsh 5-4 Coasting Downshift

Some 2015 F-150 vehicles may exhibit a harsh or firm 5-4 downshift. The condition usually occurs while coasting with very light accelerator pedal between 40-56 Km/h (25-35 MPH). There is no risk of damage or long term durability to the transmission in these cases. Engineering is currently investigating this concern.
