SUBJECT: KIA GLOBAL INFORMATION SYSTEM (KGIS) - SEARCH ENHANCEMENT AND NEW FEATURES

4. A new service information section called “Technician Basics” is added. This information section covers basic procedures technicians need to know when performing diagnostic and repairs, from basic engine to electrical diagnosis. Technician Basics was created as an aid to assist technicians if a little help is needed as a refresher to perform certain diagnostic and repair procedures.

The screenshot shows the KIA Global Information System (KGIS) interface. At the top, there are tabs for 'Service Materials', 'Publication', 'Diagnostic Tools', and 'Tools & Equipment'. Below the tabs, there is a search bar with fields for 'Year', 'Model', 'Search Text', 'Doc Date', and 'Doc Date'. The main content area is titled 'Technician BASICS' and specifically 'AMPERAGE TEST'. It includes a table of contents on the left with various test categories like 'General Information(11)', 'Fuel System(2)', etc. The main content area contains sections for 'OVERVIEW', 'TOOLS REQUIRED', 'PREPARATION', 'PROCEDURE', and 'RESULTS'. The 'PROCEDURE' section includes a detailed circuit diagram with numbered points (1, 2, 3) corresponding to the steps. The 'RESULTS' section shows a digital multimeter displaying a reading of 9.97. A note at the bottom of the page says 'Refer to Service Information for vehicle specifications.'

Technician Readiness:

Take a few moments and navigate through the new features available in this enhancement. KGIS familiarity will increase technician productivity through reduced diagnosis and repair search time.
