Symptom	207000 Entertainment Systems
Content	Note: Only applicable to 16my vehicles onwards.

Content (continued)

Note: Only applicable to 16my vehicles onwards.

Issue
The Telematics module (TCU) cannot be activated at PDI.

Cause
If a vehicle has both a TCU and Wi-Fi, and if Wi-Fi is turned on, the PDI process will attempt to use the Personal Sim Card (PSIM) for connectivity to backend services. This will affect activation.

Action
The Wi-Fi is by default turned off for vehicle delivery and should not be turned on until the PDI is complete.

Topix will be update at the earliest opportunity
