Safety Recall: 2008-09 Accord SRS Unit**AFFECTED VEHICLES**

| Year | Model | Trim | VIN Range |
|-------------|--------------|-------------|---|
| 2008-09 | Accord | 4-Door | Check the iN VIN status for eligibility |

BACKGROUND

The SRS threshold setting for the side impact sensor is such that with the vehicle ignition on, if there is a strong, non-vehicular collision impact to the lower body of the vehicle or if a door is shut with extreme force, the SRS ECU may interpret the input as a crash and command the seat airbag and/or side curtain airbag to deploy. Airbags that unexpectedly deploy increase the risk of injury.

This bulletin will be revised in the future once the repair procedure, tool information, and warranty claim information are available.

CUSTOMER INFORMATION: The information in this bulletin is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely maintain your vehicle. These procedures should not be attempted by "do-it-yourselfers," and you should not assume this bulletin applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Honda automobile dealer.
