Title	Active Exhaust Valve DTC P2169-13 Flagged.
Category	Engine
Last modified	24-Aug-2015 00:00:00
Symptom	403000 Exhaust System Concerns

ContentIssue:

Upon vehicle interrogation when using SDD, fault code P2169-13 may be present. Discovery 4/LR4, 16 model year only. V6 gasoline (AJ126SC) only. From VIN 777510 onwards.

Cause:

Car Configuration Files (CCF) incorrectly set and enabling the active exhaust valve which is not fitted on these vehicles.

Action:

No action required. The false flagging of the DTC will cause no customer concerns and does not effect the performance of the vehicle in any way.

Engineering are aware of this concern which is currently under investigation.
