Title	Brake Caliper Discolouration.
Category	Chassis
Last modified	05-Jan-2015 00:00:00
Symptom	306000 Tyres/Wheels
Content	<u>Issue:</u> Brake caliper discolouration.

Cause:

Damage to the caliper finish while cleaning the vehicle and, or the road wheels.

Action:

When using a propriety wheel cleaner, please read and adhere to the manufacturer's instructions prior to use. Note that the detergent should NOT be left on the wheel beyond the specified time and is thoroughly washed off all components after use.

Make sure the vehicle brake caliper is not warm/hot when the detergent is applied as this practice will significantly accelerate the chemical reaction and may result in damage to the finish of the caliper even within the manufacturer's recommended time.

Warranty claims relating to damage of this nature are not a manufacturing defect and as such will be rejected.
