Safety Recall: MDX CMBS Error**AFFECTED VEHICLES**

Year	Model	Trim	VIN range
2014–15	MDX	Advance and Advance SH-AWD	Check the iN VIN status for eligibility

BACKGROUND

Under certain specific driving conditions, the collision mitigation braking system (CMBS) could lock on an incorrect target. If this occurs, the CMBS may apply the brakes in an attempt to stop the vehicle. If the vehicle suddenly slows or comes to a stop, it could increase the risk of a crash.

If you have a client who is concerned about the CMBS activating, you can direct them to turn it off by pressing the CMBS OFF button for about one second. The CMBS indicator in the instrument panel will come on and stay on until the CMBS OFF button is pressed again to turn the system on.

This bulletin will be revised in the future once the repair procedure, software information, and warranty claim information are available

CLIENT INFORMATION: The information in this bulletin is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely maintain your vehicle. These procedures should not be attempted by "do-it-yourselfers," and you should not assume this bulletin applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Acura automobile dealer.
