

GPOP - Issue Review System

Part Number: 68005464A\$, 68067109A\$

Part Description: Thermostat, Engine

Issue 1) If a Ram truck 2013 or 2014 model year equipped with a 6.7L Cummins Turbo Diesel has an active or stored P0128 fault code in the PCM, then please contact Christine Donegan with STAR Support Center at (866) 799-1692 ext. 1257 for instructions on returning the thermostat via Fast Track process. Cummins is actively investigating this fault code and would like to receive suspect components from the field for further investigation and testing.~

2) Important! There has been an application change to the Cummins turbo diesel thermostat. When replacing a thermostat confirm the correct replacement is chosen.~

2010, 2011, and 2012 RAM Trucks 2500/3500/4500/5500 engine coolant operating temperature has been increased to 200 degrees requiring thermostat 68067109AA.~

2009, 2013, and 2014 RAM Trucks 2500/3500/4500/5500 engine coolant operating temperature is 190 degrees requiring thermostat 68005464AA.~

These thermostats are not interchangeable and doing so will result in reduced engine performance.
