

GPOP - Issue Review System

Part Number: 68005464A\$

Part Description: Thermostat, Engine

Issue Engine Thermostat~

Description:

If a 2013 or 2014 vehicle comes in with an active or stored P0128 fault code in the PCM please contact Christine Donegan with STAR Support Center at 1(866) 799-1692 ext. 1257 for further instructions on returning the thermostat via Fast Track process. Cummins is actively investigating this fault code and would like to receive suspect components from the field for further investigation and testing.~

Important! Do not use this thermostat on a 2010, 2011, or 2012 DJ/D2 (Ram 2500/3500) pickup truck. The 2010, 2011, and 2012 DJ/D2 use a new 200 degree thermostat and the engine software is calibrated accordingly. Using this 190 degree thermostat on a 2010, 2011, or 2012 DJ/D2 will cause driveability/performance issues. Conversely, do not use the new 200 degree thermostat (P/N 68067109AA) in a 2009 or 2013 and 2014 truck as it will cause cooling/performance issues as well.~
