## PRODUCT IMPROVEMENTS VIDEO

We have recently made several minor improvements to our trailers that may not be immediately obvious but will improve the functionality of the trailer. In this video Bob Letkeman will walk you through these changes.

Link to video: <https://vimeo.com/151434902> Password: PJ

### 1. Larger diameter conduit for wiring (3/4" to 1")

Allows for easier installation of new wiring for accessories like gooseneck light bars and reverse lights

### 2. Redesigned gooseneck toolbox lid latch striker

Striker redesign allows for a more consistent latch and easier adjustment.

### 3. Battery Tie Down Tray

The battery will no longer sit directly on the bottom of the toolbox and will have a dedicated tray. The battery will also be secured via a nylon strap instead of rubber strap (less vibration and movement). Coming February 2016.
