

# Product Upgrade Bulletin

**UPGRADE BULLETIN:**  
**160831REV**

**YEAR(S) AFFECTED:**  
2016, 2017

**PRODUCT(S) AFFECTED:**

Fleetwood:

MY 2016 Storm  
MY 2016 Terra SE  
MY 2016-2017 Flair  
MY 2017 Jamboree

Holiday Rambler:

MY 2016 Admiral  
MY 2016-2017  
Admiral XE  
MY 2017 Vesta

**MODEL(S) AFFECTED:**

All manufactured per DC's 16-42 and later and shipped prior to July 30, 2016

**SUBJECT:**

Wiring correction to allow recharging of the auxiliary batteries via the alternator

**KEYWORDS:**

battery, aux batteries, charging

**ISSUE DATE:**  
September 2016

© 2016 REV Recreation Group Inc.

The purpose of this product upgrade service bulletin is to inform all REV dealers of the need to inspect, and if necessary, correct the wiring attached to the Battery Isolation Manager to allow recharging of the auxiliary batteries via the chassis alternator. A list of affected (Class A and Class C gas product) unit serial numbers appears at the end of this Bulletin.

**CONDITION:**

If a green wire (Circuit 529) was installed at the "GEN" terminal on the Battery Isolation Manager, the auxiliary and main battery banks will be isolated while the chassis ignition is turned on; this will prevent the alternator from recharging the auxiliary batteries. Disconnecting the green wire from the "GEN" terminal will enable the chassis alternator to charge the auxiliary batteries.

**INSPECTION:**

Follow the steps below to inspect the wiring for the Battery Isolation Manager and if present, disconnect a green wire (circuit 529) from its terminal, thus removing it from the circuit.

1. Park the motor home on dry, level pavement. Turn off the ignition and remove the key. Place the transmission in PARK and set the parking brake. Turn off the ignition and remove the ignition key. Maintain control of keys while work is performed.

**WARNING**

- ENSURE THE IGNITION KEY IS TURNED OFF AND REMOVED BEFORE BEGINNING WORK.
- REMOVE ALL JEWELRY BEFORE WORKING ON OR NEAR BATTERIES OR ELECTRICAL CIRCUITS.

2. Remove the entry step cover to locate the Battery Isolation Manager. Referring to Figure 1:
  - a) If a green wire is not connected to the Battery Isolation Manager, no repairs are required and this bulletin is complete.
  - b) If a green wire is attached to the "GEN" terminal on the Battery Isolation Manager, proceed to step 3, "CORRECTION", next page.

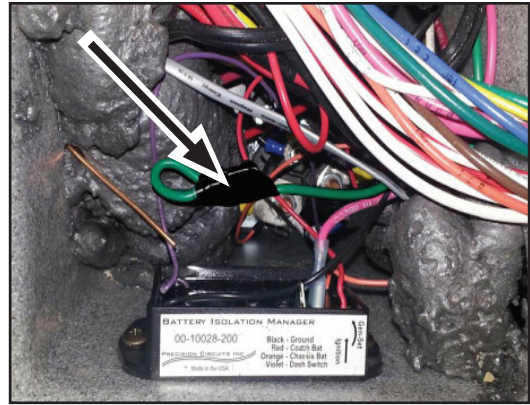

Figure 1 - Battery Isolation Manager Wiring Before Correction

*This bulletin is supplied for technical information only and is not an authorization for repairs.*

*"It is impossible to know, evaluate and advise the service trade of all conceivable ways in which service might be done or of the possible hazardous consequences of each way. Accordingly, anyone who uses a service procedure or tool must first assure that neither personal safety nor vehicle safety will be jeopardized by the selected service methods."*

**CORRECTION:**

- 3. Referring to Figures 1 and 2, remove the Green wire (marked 529) from the "GEN" terminal at the Battery Isolation Manger. Apply heat shrink tubing to the end of the disconnected wire. Wrap electrical tape around the heat shrink tubing to complete the procedure.

**Figure 2 - Battery Isolator Wiring After Correction**

**PARTS**

<u>Part number</u>	<u>Description</u>	<u>Qty.</u>
Obtain locally:	Heat Shrink tubing	As required
Obtain locally:	Electrical Tape	As required

**TOOLS**

Heat Gun

**WARRANTY LABOR ALLOWANCE:**

Product Upgrade 160831REV Battery Isolator Wiring Inspection/Correction

<u>Use Flat Rate Code:</u>	<u>Time</u>
